Note: Figures as of 2015, based on the Labeled Faces in the Wild (LFW) dataset

What do the others have?

Usual suspects:

- Seamless big markets
- Infrastructure
- Capital flows (private and public)
- Research linked to markets
- ...

Cultural advantage

93% of Chinese customers are willing to share their location data with the manufacturer of their car, compared to 65% of Germans and 72% of Americans

Would you allow your car to track your location and report it anonymously, e.g., to enable your carmaker to improve the next generation of your car?

Percent

Optimal response strategy

- (1) Create a framework that **supports AI**
- (2) **Identify** and **address social risks** setting global quality standards
 - *Europe still the richest market*
 - *Long-term demand stability*

Substitution

Vs

Augmentation

employer – employee 4.0

AI Big Question

*What is the **optimal level of discrimination** in our society?*

Facebook's WhatsApp + Messenger = 80% of the market

WhatsApp Messenger Viber Line WeChat Telegram
KakaoTalk imo Zalo BBM ChatOn

SUPPORT

EDUCATE

**EU Artificial
Intelligence Strategy**

ENFORCE

HUMAN-CENTRIC

- (1) Foster **DSM** (connectivity, computing facilities, data flow and access)
- (2) Stimulate AI **adoption** / data multiplier effect
- (3) Support **research**
- (4) **Skills** and **education** actions
- (5) **Competition policy 4.0** for functioning markets
- (6) Action Plan for **Human-Centric AI**

A European Action Plan for Human-Centric AI

EC AI Strategy – Three Pillars

- (1) ***Boosting EU technology and industrial capacity***
- (2) ***Addressing AI's socioeconomic impact***
- (3) ***Ensure an appropriate human-centric ethical and legal framework***

[1] Competitiveness

- (1) aim to get €20bln financing by 2020 (public + private)
- (2) Increase EC's investment by 80% in 2018-2020 to reach €1.5 bln (H2020)
- (3) Support pan-European network of AI excellence centres
- (4) AI on-demand platform: access to algorithms and expertise to SMEs
- (5) Industrial data platform
- (others)

[2] Socioeconomic implications

- (1) 2018: Dedicated retraining schemes
- (2) Gather analysis / expert inputs to anticipate changes in labour market (eg foresight report on impact of AI on education etc)
- (3) Encourage business-education partnerships
- (4) By end of 2018: smart specialisation platform to address challenges arising from AI to foster inter-regional partnerships

[3] Ethical / Legal Framework

- (1) Set up AI alliance – multi-stakeholder platform (engagement)
- (2) Expert group to draft AI ethics guidelines (by 2019)
- (3) Issue guidance on interpretation of the Product Liability Directive
- (4) Fund research on the development of explicable AI
- (5) Monitoring
